

## 2000 Series Rack Adapters

The Series 2000 bench top products can be mounted on 1 3/4" panels for rack mounting. To order this add a "R" to the model number (2004R is the rack mount version of the 2004). Although the standard rack mount configuration is one unit in a 1 3/4" rack space (**Option -R**), two (**Option -R2**) and three (**Option -R3**) of the Series 2000 products can also be mounted on a single panel (see below). Contact Cross to specify this when ordering the rack mount option.
