2016-05A L-band Downconverter

**2016-05A L-Band Downconverter** - Converts 950 to 1525 MHz to 140 MHz in 1 MHz steps with low group delay and flat frequency response. The 2016-05A Input and Output levels have been optimized to support transmit from an L-band modem to a 140 MHz IF upconverter. Multi-function push button switches select the RF frequency, gain, and other parameters. Front panel LEDs provide indication of DC power (green), PLL alarm (red), and remote operation (yellow). The gain is adjustable from 0 to +50 dB. Remote operation allows selection of frequency and gain. Parameter selection and frequency and gain settings appear on the LCD display. Standard connectors are BNC female for IF output and the optional external reference input and reference output, and Type F female for the RF input. A high stability (±0.01 ppm) reference, LNB +24 VDC, 0.4 Amps power and 10 MHz reference (includes a 10 MHz output connector), are available Options. The unit is powered by a 100-240 ±10% VAC power supply, and housed in a 1.75” X 19” X 16” 1RU chassis.
