The 2099-17 10 MHz Source / Inserter is a 10 MHz, ±0.01 ppm oven controlled crystal oscillator (OCXO) with circuitry to insert the 10 MHz signal and DC voltage on L-band lines for an LNB and SSPB. Multi-function push button switches select internal or external 10 MHz and insertion of 10 MHz on the L-band lines. LEDs indicate alarm (red), remote operation (yellow), DC power (green), OCXO oven warm-up (yellow), and presence of external 10 MHz reference (red). Remote control allows remote configuration of front panel commands and monitoring LNB and SSPB current. Parameter selection and LNB and SSPB current appear on the LCD display. Connectors are BNC female for RF and 10 MHz external input and output signals. LNB or SSPB +24 VDC can be inserted on the RF lines by installing the fuses. AC power is 100-240 ±10% VAC, 47-63 Hz. The 2099-17 is housed in a 1 RU chassis, 16” deep.
