4116-41-212 Ka-band Block Downconverter, Weather Resistant*

The 4116-41-212 Ka-band Block Downconverter converts 17.7 - 21.2 GHz to 0.95 - 1.95 GHz in four selectable fixed bands. Front panel LEDs provide indication of DC Power and PLL Alarms. The RF to L-band gain is +20 dB. Connectors are 2.92 mm for RF In, RF Monitor, and IF Monitor, SMA for external reference input and output, and Type N (all female) for L-band out. Gain, band select, and internal 10 MHz frequency are controlled by the Ethernet M&C. In AUTO, the 10 MHz reference stays in external if the external level is in the +2 to +8 dBm range. The unit is powered by a 100-240 ±10% VAC power supply, and is in a 8"W X 6"H X 16"D Weather Resistant* enclosure.

*Weather Resistant enclosures are designed to be water resistant for installation in an outdoor enclosure/antenna hut OR mounted outdoors on an antenna assembly at their specified temperature ranges. They are designed to be located “out in the elements” (water, sleet, snow, etc.) but they are not designed to be “submerged under” water.

Option W21 - Extended Temperature option (-30 to +60˚C operating, -40 to -60˚C storage) available at an additional cost Contact Cross for quote.
